FD-352 (Rov. 3-3-59)

FEDERAL BUREAU OF INVESTIGATION

Dato 11/25/63

3.

MOV 89 1363

University, Ft. Worth, Temas, but who lives in Dallas, at 2870 E. Ledbotter Street, was taking photographs during the afternoon of November 28, 1963, approximately 5:30 PM in the area just south of the spot where President KENNEDY was assassinated and had found a piece of bone. The bone was located approximately 25 feet south of the spot where President KENNEDY was located approximately 25 feet south of the spot where President KENNEDY was shot. Dr. HARDER stated that his appear immediately brought the bone to him and he and the Chief Pathologist at Mothodist Hospital, Dr. C. E. KERNS, had examined the piece of bone and both definitely felt that it is a piece of human skull.

Dr. HARPER felt that in view of the proximity of the place where the piece of bone was located it might possibly be part of President KENTEDY's skull.

WILLIAM ALLEN MARDER made this piece of bond available to SA JAMES W. AMDERTON of the Dallas FBI Office for what ever disposition the FBI desired.

Commission No. 5

on <u>11/26/63</u>	at _Dallas	s, Texas		Filo#_DL	89-43

DL 00-10

On November 27, 1963, the FEI Laboratory advised that a piece of bone reportedly located near where President KENNWDY was shot had been x-rayed and examined microscopically for bullet metals but none were found.

A small amount of blood appearing on the surface of the bone was determined to be of human origin but was too limited in amount for grouping purposes. This bone fragment was delivered to Admiral GEORGE BURKLEY, Physician to the President at the White House, according to the FBI Laboratory letter.
